

# Diamond Sear Cooking Grids

FIREMAGIC®

## Bringing Grilling to a Whole New Level!

## Diamond Sear Cooking Grids are superior!

Diamond Sear Cooking Grids have a patented\* design with bars that have a smooth flat top; each individual bar measures .333" wide at the top...covering one half of the total cooking surface. Each bar is shaped to optimally transfer the heat from the burners to the cooking surface...**food cooks faster and more evenly!**

- Made from all 304 Stainless Steel.
- Bead blasted with matte finish for non-stick surface.
- The Grids are backed by heavy duty cross-rods.
- Industry's finest Lifetime Warranty.

These cooking grids come with all Echelon, Aurora, Choice, and Stainless Steel Charcoal Fire Magic grills; a slightly smaller version comes with all AOG grills.

\* U.S. Patent No.: D857,453 & D862,984

## Fire Magic Diamond Sear (Trapezoidal) Cooking Grids

The E790/A790 (36" grill) has three cooking grids with 18 rods each, totaling 54. Each rod has .333" of food-contact surface with its trapezoidal design. This creates a **total food-contact surface of 17.98"** which is almost exactly half of the **36" cooking width**. This results in more heat transferred to your food, and provides for more even grilling. Fire Magic cooking grids have been determined by the US Patent Office Director to be a "new and original...design";

**\*US Patents #D857453 & #D862984 have issued to the RH Peterson Company.**

### Round Grid

Round grids provide contact only at the top.

### Diamond Sear Cooking Grid (Patented) \*

The flat top shape of each bar, .333" wide, optimally transfers heat to the cooking surface creating faster and more even grilling.
